MART CART's® new UL listed model is certified as a whole cart not just individual components. Stringent testing focused on the cart's design regarding numerous features. The field tests included an exhaustive number of stability, capability, maneuverability and power dynamics tests earning MART CART the deserved UL listing. Our project AU5188, category FKJA, five years in development, has reached a new apex of design.

Store managers around the world trust MART CART to provide safe, sturdy, reliable, electric shopping carts for worry-free customer service. With the daily need to provide service to seniors, disabled, and people with medical conditions, MART CART is the perfect way to treat your shoppers to a good store experience. The MART CART is the No. 1 selling electric shopping cart in the world and is now the industry's first and only UL Certified electric cart.
