

Model 5563TM

by **mart cart**[®]

The Mart Cart[®] is the No. 1 selling electric shopping cart in the world and is now the industry's first true 100% recyclable electric cart.

Intelli-Charge System

Uses both audible and visual notification features to increase the battery life of your carts. Ensures properly charged carts for your customers while offering higher performance and a lower cost of ownership.

Hub Motor Drive System

This unique front wheel is the motor!

Maneuvering store aisles is easy and effortless because the Mart Cart models actually turn within the diameter of the rear axle.

- Zero degree turning radius
- Dynamic & regenerative braking *PLUS* electro-mechanical parking brake
- 8" (2.5 cm) non-marking rubber front tire
- 2.1 MPH (3.4 KPH) Forward speed
- 1.0 MPH (1.6 KPH) Reverse speed

Quick Change Battery Cover

No tool battery change in 60 seconds! Reduce downtime & service charges with a store level battery change. Designed with safety in mind - the battery cover only goes on one way.
